The EPA action/response on Missouri's 2015 monitoring network plan is in the final stage of review. We expect to have this action completed by the end of January 2016.

Our website, in general, has been in a state of transition over the last several months. I share that just to say that you can contact me or Mike Jay to check on status as the website may or may not have up to date information.

Thanks!

Amy,

One more question. Has EPA made an approval/disapproval/other determination regarding Missouri's 2015 monitoring network plan? The Region 7 website has information regarding 2014 approvals, but I didn't see anything re 2015 plans - <http://www.epa.gov/ks/region-7-air-quality-program>.

Thanks.

Maxine

Yes, my impression is the state is reviewing the quality-assured SO2 data and

may develop a Clean Data Determination for Jefferson County.

I am not clear on Missouri's timeline for the development of a request, but I believe that the MDNR air program may provide status and updates on sulfur dioxide activities/information at upcoming MACC meetings.

The next MACC meeting is on Tuesday, February 2, 2016 1730 E. Elm St. - Lower Level Bennett Springs Conference Room Jefferson City, MO 65101, and any discussion of SO2 values or Clean Data Determination would most likely be part of the Air Quality Planning report on the agenda.

Amy,

Thanks for the conversation this morning and for the follow-up information.

Are you anticipating that DNR may be submitting a proposed clean data determination for Jefferson County? If so, do you know when that would be submitted and how we would find out about it?

Thanks again.

Maxine

Maxine, per our conversation, I'm following up status of the Jefferson County Missouri nonattainment SIP.

The state of Missouri submitted the plan on June 5, 2015.

As of December 5, 2015, this SIP is complete by operation of law.

If you should have further questions, please feel free to contact me or Mike Jay.
